QLabel : Q68

Q3037625) A Student-Led Initiative for Sustainable Development on Campus

In a bustling college campus, a group of students decided to take action towards creating a more sustainable environment. They organized a "Green Week" initiative, encouraging fellow students to participate in various activities such as tree planting, recycling drives, and workshops on reducing plastic usage. Each day of the week focused on a specific theme, including sustainable transportation, energy conservation, and waste management. The students collaborated with local businesses to provide incentives, such as discounts for those who walked or biked to campus. This initiative not only raised awareness about the importance of sustainability but also fostered a sense of community among students who were passionate about making a difference.

The Student-Led Initiative for Sustainable Development on Campus aims to make cities and human settlements inclusive, safe, resilient, and sustainable. Through their efforts, the students demonstrated how collective action can contribute to building a more sustainable future for their campus and beyond. Select the SDG that is aligned the most for the given scenario.

- A) SDG11. Make cities and human settlements inclusive, safe, resilient and sustainable
 - B) SDG4. Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all
 - C) SDG5. Achieve gender equality and empower all women and girls
 - D) SDG10. Reduce inequality within and among countries

QLabel : Q90

Q3037647) What combination represents a challenge in implementing the 5Rs for Sustainable Development?

- A) Lack of awareness and linear production
 - B) Recycling and waste disposal
 - C) Rigid organizational culture and sustainability
 - D) Minimizing waste generation and economic growth
-

QLabel : Q91

Q3037648) The conceptual framework commonly referred regarding the concept of Sustainability is succinctly described by 3Ps (profit, planet and people) or alternatively by economic, environmental and societal components. This is referred to as as proposed by Elkington (1998)

- A) Triple Bottom Line
 - B) Sustainable Bottom Line
 - C) Tropical Bottom Line
 - D) Tolerance bottom Line
-

QLabel : Q92

Q3037649) When design of products, processes, and systems includes integration and interconnectivity with available energy and materials flows, the methodology supports

- A) "Reduce" and "Recycle" principles of 5'Rs
 - B) profitability
 - C) energy balance
 - D) continuity
-

QLabel : Q93

Q3037650) The "Recycle" principle can be applied to:

- A) Only consumer products.
 - B) All aspects of daily life, including consumption, transportation, and energy use.
 - C) Only industrial processes and manufacturing.
 - D) Only government policies and regulations.
-

QLabel : Q94

Q3037651) By adopting the "Reduce" principle, individuals can contribute to:

- A) Depleting natural resources and exacerbating environmental problems.
 - B) Creating a more equitable and just society.
 - C) Preserving the planet for future generations.
 - D) Increasing economic inequality and social unrest.
-

QLabel : Q95

Q3037652) How could a technical teacher encourage their students to participate in initiatives like a "Buy Nothing New-Best of Waste" in the context of 5Rs?

- A) Discuss the environmental impact of excessive consumerism.
 - B) Organize workshops on repairing and refurbishing old electronics.
 - C) Promote responsible waste disposal practices in the community.
 - D) Encourage students to buy new and trendy clothing items.
-

QLabel : Q96

Q3037653) What is the primary role of leadership in the development of organizational culture for Sustainable Development?

- A) Enforcing rigid policies
 - B) Setting sustainability goals
